DETAILED ACTION

Election/Restrictions

1. Claims 33-36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made without traverse in the reply filed on 1/9/06.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter recited in claims 6, 16, 19 and 26 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 12-13, 16 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being

indefinite for failing to particularly point out and distinctly claim the subject matter which

applicant regards as the invention.

In regard to claim 12, it is unclear how there can be a "third radial shoulder" when a

second radial shoulder has not yet been claimed.

In regard to claim 13, it is unclear how there can be a third and fourth bolt hole when a

second bolt hole has not yet been claimed.

In regard to claim 16, it is unclear how the pipe can have two fluid paths that end in a

radial shoulder. Also, it is unclear how there can be a third radial shoulder when a second radial

shoulder has not been claimed. Is the "a third radial shoulder" the same "a third radial shoulder"

recited in claim 12?

In regard to claim 21, it is unclear how there can be a third and fourth bolt hole when a

second bolt hole has not yet been claimed.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/811,132 Page 4

Art Unit: 3679

the bore;

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-2, 4-5, 12, 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Sloan '236.

In regard to claim 1, Sloan discloses a fluid distribution system comprising;

a hollow pipe section C having at least one bore A extending longitudinally therethrough;

at least one longitudinal boss F2 extending along the pipe section and positioned about

an end fitting I' comprising:

a hollow body K configured to be received in the bore;

a shoulder I' extending radially from the body and configured to abut against an end surface of the pipe section;

at least one bolt hole J extending through the shoulder and configured to align with the at least one longitudinal boss; and

at least one fastener extended through the at least one bolt hole and secured in the at least one boss; and

a secondary component D configured for attachment to the end fitting.

In regard to claim 2, wherein the body has an outer diameter substantially equal to an inside diameter of the bore.

In regard to claim 4, the bore has a diameter and the shoulder I' has an outside diameter greater than the bore diameter.

Application/Control Number: 10/811,132

Art Unit: 3679

In regard to claim 5, wherein the shoulder I' has a first planar surface configured to abut against the end surface F2 of the pipe section and a second planar surface opposite the first planar surface and configured to abut against the secondary component.

Page 5

In regard to claim 12, the secondary component includes a pipe portion with a third radial shoulder D' extending from the pipe section.

In regard to claim 18, the pipe portion C includes a smooth hollow pipe.

In regard to claim 19, the pipe portion includes a threaded D2 hollow pipe.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sloan in view of Wendel. Sloan discloses the use of a straight pipe, but not a T or elbow. Wendel teaches that straight pieces of pipe, Ts and Elbows are well known equivalent pieces of pipe that can be used together in a piping system. Inasmuch as the references disclose these elements as art recognized equivalents, it would have been obvious to one of ordinary skill in the art to substitute one for the other in the system of Sloan. In re Fout, 675 F.2d 297, 301, 213 USPQ 532, 536 (CCPA 1982).
- 9. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sloan in view of Quevedo del Rio. Sloan discloses the secondary component as a pipe D, but not as a plate configured to cover the bore. Quevedo del Rio teaches that pipes (68 in fig. 2) and plates (22 in

Application/Control Number: 10/811,132 Page 6

Art Unit: 3679

fig. 1) are well known equivalents in the art. Inasmuch as the references disclose these elements as art recognized equivalents, it would have been obvious to one of ordinary skill in the art to substitute one for the other in the system of Sloan. <u>In re Fout</u>, 675 F.2d 297, 301, 213 USPQ 532, 536 (CCPA 1982).

10. Claims 25 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sloan in view of Stafford. Sloan discloses a flanged expansion joint that can be quickly and easily assembled, but does not disclose that the bosses are threaded. Stafford teaches using a threaded boss 14 and tapping fastener 15', which reduces the part count needed to assemble the joint, thereby improving the ease in which the joint can be assembled. Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify the boss of Sloan to include a thread, as taught by Stafford, in order to make the joint easier to assemble by reducing the number of parts need to make up the joint.

Allowable Subject Matter

11. Claims 3, 6-11, 13-15, 21-24 and 27-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David E. Bochna whose telephone number is (571) 272-7078. The examiner can normally be reached on 8-5:30 Monday-Thursday and every other Friday.

Application/Control.Number: 10/811,132 Page 7

Art Unit: 3679

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571) 272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
